Democratic Platform

The Democratic party of Hawaii in its plenary convention assembled, recently held prior to the National Democratic party, the principles of which we believe are the most advanced of the rights of American citizenship, and the best basis for the welfare of the American people, which we defend, the American people, and which in their opinion will retain purity and integrity of right and of responsibility to every human being.

We declare our belief that the application of these principles to the administration of government will give us the full measure of self-government referred to in the past and now in other territories of the United States, will restore the condition of our civil system, and will give us better time and peace.

In this belief we urge upon the Democratic party of Congress such a revision of our local laws as will take from the members of the Territory power of ultimate though exchange, the public lands of this Territory, a power under which successive territorial laws have and are being utilized and given or large and modest sums, and is vital to the interests of this Territory and imperative that same prompt and decisive action be taken to preserve the remaining powers of the public lands of this Territory, for instance by local administration, etc., etc., to give our delegates to the National Democratic Convention no endorsement or endorsement of the innocent but dishonest practices during the application of the principles of the first law of the United States to the territory of Hawaii.

We call on the Democratic party of Congress to declare the Democratic party that the full rights of local self-government vested in the people of this territory, may be accomplished without violation of others and democratic principles and without suspending the people with territorial departments and officials unambitious and unscrupulous.

To eliminate all citizens of the territory, we approve the policy of thoroughly reorganizing these islands in the strategic support of continental interests, and are satisfied with the action already taken in carrying out this policy, and we trust the good and American citizens shall be employed on useful work in this territory, whether their work shall be done by contract or otherwise.

We call on the citizens of Hawaii and all that the territory can do in its full possibilities of prosperity or happiness for its people or that of a system of labor conditions which not only discriminates against American citizens but associates slavery with labor. The Democrats of this territory have stood inviolate for principles of American citizenship and have consistently held aloof from all public expression and demonstration resulting to place this community in the attitude of a pioneer or alien people in the eyes of the nation. We have, therefore, refused to participate in the repeated request of our Republican fellow citizens here for discriminating legislation at the hands of Congress in the interests of our so-called peculiar local needs and conditions. We desire that either our industries or our commerce had justification except that contrary to that enacted for the rest of the American people.

We review the denunciations of the Democratic party of the Territory made two years ago in regard to a political resolution to be made by Congress for Queen Liliuokalani, and urge Congress to act speedily in the matter.

The Democratic party of Hawaii, before William Jennings Bryan for President, and instructs its delegates in the National Convention to express by united voice this choice, so long as it remains a candidate before the convention.
